

Task 1: Professional LinkedIn Announcement

Robotics & Automation Internship — Progree

1. Internship Task Overview

This document details Task 1 for the Progree Robotics & Automation Internship program. The objective is to establish professional network presence, communicate learning goals, and share the official internship acceptance with the engineering community.

- Program: Robotics & Automation Engineering Internship
- Organization: Progree
- Core Focus: Control Systems, Kinematics, Industrial Automation, Embedded IoT

2. Professional LinkedIn Post Caption

Below is the structured, engaging copy prepared for the announcement:

```
■ Excited to announce that I have officially joined Progree as a Robotics & Automation Engineering Intern! ■■  
  
During this internship, I will be working on exciting real-world engineering challenges, including:  
■ Designing and tuning closed-loop PID control systems for autonomous mobile robots  
■ Modeling multi-axis robotic arm kinematics (Forward & Inverse Kinematics) for precision pick-and-place  
■ Architecting smart industrial automation lines with multi-sensor sorting and edge telemetry  
■ Developing robust PLC ladder logic and failsafe automation sequencing  
  
I am eager to learn, build, and collaborate with inspiring mentors and peers. A huge thank you to Progree for this incredible opportunity!  
  
#Progree #robotics #automation #engineering #progress #internship #embedded #controlsystems #careergoals
```

3. Learning Objectives & Goals

- Goal 1: Master Proportional-Integral-Derivative (PID) closed-loop control tuning in virtual and physical mobile robot systems.
- Goal 2: Gain mathematical and computational fluency in Forward and Inverse Kinematics for 3-DOF and 6-DOF robotic manipulators.
- Goal 3: Design industrial conveyor networks incorporating photoelectric, ultrasonic, and color sensor feedback with fail-safe logic.
- Goal 4: Understand modern edge communication telemetry protocols (MQTT/JSON) for smart manufacturing monitoring.

4. Verification & Submission Guidelines

To complete this task:

- 1. Attach a high-resolution copy of your official Progree Offer Letter.
- 2. Tag the official @Progree LinkedIn page in your post.
- 3. Ensure all specified hashtags are included: #Progree #robotics #automation #engineering #progress.
